

There Is But One True Blood Purifier

Prominently in the Public Eye To-Day. The Great New York Jobbing Houses Give a Verdict For

Hood's Sarsaparilla is the only true blood purifier.

The truth of this statement is abundantly proved by the unimpeachable testimony of druggists and dealers at the present time, March, 1906. Through a long series of years these men have handled Hood's Sarsaparilla, and they have seen scores of other medicines come to the surface for a short time and then disappear forever, while Hood's Sarsaparilla has continued to be increasingly in demand. The fact that Hood's Sarsaparilla has held the leading place in the field of medicine is no surprise to those who realize the peculiar virtues of this great remedy.

Hood's Sarsaparilla is the only true blood purifier.

Think what this fact means. Look at it in the light of that vast mass of unimpeachable testimony which has been laid before the public year after year. Recall the thousands in the North, South, East and West who have said of years of suffering and discomfort and hundreds of dollars expended for medicines that did no good, until Hood's Sarsaparilla was tried and Hood's Sarsaparilla cured.

Think of the multitude of sufferers from scurvy, rheumatism, dyspepsia, nervousness, who have been restored to health and happiness by Hood's Sarsaparilla. This thing has been accomplished, not once or twice or a hundred times, but in thousands and thousands of cases, and frequently after the skill of physicians and the virtues of all other remedies had been exhausted.

What is the reason for this unparalleled success? It is simple, plain, easily stated and easily understood. It is this: Pure, rich blood is the basis of good health, and Hood's Sarsaparilla purifies and enriches the blood.

This statement tells the whole story.

This fact explains the wonderful cures by Hood's Sarsaparilla, and it is the reason for those marvelous tales of relief from suffering which have been told from one end of this continent to the other, and even far across the sea.

Hood's Sarsaparilla is the only true blood purifier. This is why Hood's Sarsaparilla cures when all other purifiers fail.

This now a comprehensive, common-sense view of the purification of the blood and its great importance to health. Every one knows that the pure theory of disease is a truth which science has fully demonstrated. It is equally well known that these germs are lodged and developed in the blood. Now, the blood is in the highest sense the "vital fluid." It is the current of life. It carries nourishment to every organ and tissue and furnishes support to every function of the body.

What could be more natural, more unavoidable than that diseased, impure or vitiated blood

should scatter disease throughout the system and break down the vital force?

What could be more reasonable than the doctrine that purifying and vitalizing the blood and destroying the germs of disease by the use of the great blood purifier, Hood's Sarsaparilla, will actually and permanently cure every form of disease which has its origin in the blood? These diseases are too many to enumerate, and probably they are more than even medical men have ever thought. But it is well established that scurvy, rheumatism, gonorrhea, weak nerves, dyspepsia, catarrh and every form of scurvy, blood, the nerves must have proper nourishment supplied to them by the blood, and the stomach and digestive organs also derive their powers from the vital fluid. No human being, with pure, rich, healthy blood, has ever complained of nervousness or dyspepsia, and a person in such a condition is well fortified against every attack of disease.

Hood's Sarsaparilla makes pure blood; therefore it cures disease. It is the only true blood purifier, and the ideal and standard purifying medicine, and its importance to the health of this community, by reason of its general use, and because of its power to purify the blood and destroy the germs of disease, it is simply impossible to estimate.

The testimony of leading wholesale druggists, given freely, is carefully and conscientiously made, in view of their sale of Hood's Sarsaparilla in this present winter of 1906. It is well as it is past years. This testimony must be accepted as conclusively proving that Hood's Sarsaparilla is the most prominent blood purifier, and therefore that it is the best blood purifier, and the most powerful and successful cure in the world to-day.

Hood's Sarsaparilla makes pure blood; therefore it cures disease.

MR. E. O. WELLS, OF C. N. CRITTENTON & CO.

PECULIAR TO ITSELF.

That is why Hood's Sarsaparilla sells and cures. The firm of Lehn & Fink, in William Street, New York.

York, has, probably, the largest German trade in the United States. They have twenty-one

travelers all over the country, and do a large business on the Pacific coast and in South America. Mr. Lehn has now retired, and Mr. Albert

Plaut is now Mr. Fink's partner. The firm make this statement under date of March 12, 1906.

"We do not hesitate to say that Hood's Sarsaparilla is the leading blood purifier. In fact, 'blood purifier' and 'spring medicine' may be said to be synonymous terms for Hood's Sarsaparilla."

"It is recognized throughout the entire country as the medicine for making rich, red blood, and our sales of Hood's Sarsaparilla are many times those of any similar preparation."

"It is marvelous how this medicine has held the confidence of the people. Many other articles have come up and gone down, while Hood's Sarsaparilla still holds and increases its sales. Such a record must be taken as proving all that is claimed by its proprietors."

SALES ARE PHENOMENAL.

Continued Increase Proves Its Merit.

The business reputation of the house of Tarrant & Co., wholesale druggists at the corner of Greenwich and Warren streets, New York, is as solid as the elegant new building the firm now occupies. Whatever they say is entitled to implicit confidence. Here is their letter:

"New York, March 13, 1906.

"Messrs. C. I. Hood & Co., Lowell, Mass.

"Gentlemen: When the first attempt was made to introduce Hood's Sarsaparilla, we did not believe the article could be successfully marketed, but to-day it sells with us as phenomenal, leading by far those of any other blood purifier we carry in stock."

"The long-continued and increasing sales of the preparation are an evidence of its value as a medicinal agent, for during our sixty years' experience in the drug business we have never known a preparation to sell largely and continuously without possessing intrinsic merit."

"TARRANT & CO."

JUST WHAT THE PEOPLE WANT.

A Sterling Blood Purifier and Spring Medicine.

The firm of R. W. Robinson & Son has withstood the storms of New York city trade for thirty-five years, and is a prosperous and successful house. The present proprietor is Mr. Frederick M. Robinson, son of the founder. Owing to the widening of Greenwich street, where the business has always been located, the old home of the firm has been torn down and a new building, especially constructed for the business, is just being finished. Mr. Robinson has an enviable business record, free from all Congressional connections, and he believes in doing the right thing and the nation's business in a businesslike way. He says, in March, 1906:

"Among the articles we sell Hood's Sarsaparilla has the leading place. With us, as in every other retail drug store in the country, it is as staple as any of the drugs or herbs. The sales of

Spring Medicine.

At this season, more emphatically than at any other, we should build for the future.

When Nature gives vitality to field and wood, there should be the harmony of renewed life and energy in our physical systems.

But, on the contrary, we find ourselves weak, dull, tired. This is because in the winter we have been housed up in poorly ventilated offices, homes and shops, our blood has become thin and impure, and is unequal to the demand of the body for more life, more vigor, more energy, more strength.

Nature imperatively cries for help! Where is it to be found?

Logically enough, in a good spring medicine, like Hood's Sarsaparilla, the great blood purifier.

This preparation has proved in many years of test that it supplies the demand as nothing else can.

So easy to take and so readily assimilated, the purifying, vitalizing and enriching elements of Hood's Sarsaparilla—combined from Nature's own storehouse of vegetable remedies for human ills, pass into the stomach and are then silently but certainly taken up by the blood and sent to every organ and tissue of the body.

The effect is often magical. The weakness is soon driven off, that tired feeling disappears, the nerves are built up, the stomach resumes its tasks greedily, the appetite becomes as "sharp as a whetstone," the whole man feels "as if made new."

The wonderful cures of scurvy, salt rheum and other dreadful diseases prove the great curative, blood-purifying powers of Hood's Sarsaparilla.

You undoubtedly need a good Spring Medicine. Take the great blood purifier.

The One Leading Blood Purifier.

Standard of Purity and Excellence.

Ills.

The young and enterprising firm of C. G. Bacon & Co., at 218 Greenwich St., New York City, succeeded to the business of Fraser & Lee, wholesale druggists, and more recently to the jobbing business of the old and well-known firm of Hall & Buckel. Under the management of Mr. C. G. Bacon, the old business is doing a large and increasing business. Mr. Bacon says:

"There is only one story to tell about Hood's Sarsaparilla. We sell more of this medicine than of any other article in our stock. It is the one leading blood purifier. I have perfect confidence in Sarsaparilla as a blood cleanser, and believe it is the proper thing to take such a medicine in the spring. This I say, not because we sell the article, but because it is my personal conviction that a spring medicine

is the best thing to take in the spring.
